

Please do NOT mess with XM or any other satellite radio service. These businesses provide what has , in the past, made America great. They provide a valuable, quality service at a reasonable, affordable price. Should the traditional broadcast providers wish to compete, let them compete. Let them improve their product, not restrict others' product which may, in fact be superior.

XM Instant Traffic & Weather: Is someone really trying to restrict this to local providers? What ever can this mean? How long has it been since out local stations have been owned and produced locally? CNN has weather and traffic. Is CNN owned and produced locally? Maybe for some . .
